#### Mines and Mining Stocks

## **NEW BONANZA**

City Rocks Property Has MINING STOCK EXCHANGE. Opened Up Immense Bodies of Rich Ore.

while the chief officials of the corporation are now in the city after a several days' trip to the property and a look over the camp generally, modesty has kept them from saying anything. President W. S. Cleaves, Secretary and Treasurer James Edwards, John Edwards and others, including W. J. Lawrence, were in the party, and it is to the last named that The Herald is indebted for a brief statement touching and records of sales made during the day; not store the chief officials of the corporation are now in the city after a several days' trip to the city after a several days' trip to the property and a look over the camp generally, modesty has kept them from saying anything. President W. S. Cleaves, Secretary and Treasurer James Edwards, John Edwards and others, including W. J. Lawrence, were in the party, and it is to the last named that The Herald is indebted for a brief statement touching and records of sales made during the day: debted for a brief statement touching the physical condition of a property that has grown into one of the big mines of the state without a word from

those who have been doing the work. "I don't know whether they will like it or not," said Mr. Lawrence yester-day, "but I want to say that I have not been surprised as much as I was on this trip for many a long day. I supposed the property was a good pros-pect; I had not the slightest idea that t was a mine of any magnitude, much less such a bonanza as it is. The City Rocks tunnel, the deeper of three in the property, is in over 2,700 feet; the last 2,400 feet of it being in the vein. Five or six shoots of ore have been opened up by this tunnel. One of them, the one that is being mined at the present time, is 260 feet long and contains over 500 feet of backs up to the next tunnel above. This shoot averages five feet thick, and the ore from I am told, nets the company from \$40 to \$50 a ton. In the face of this tunnel, which is 900 feet below the surface, there are twenty-three feet of ore exposed now, and it looks as though it was getting bigger all the time. From this tunnel winzes have been sunk in ore to a depth of 160 feet, and from all that I could see there is practically no limit to the amount of ore that might be developed in the property, nor to the tonnage that might, with transportation facilities, be sent to market.

Mr. Lawrence said he was told at the property that the company was gradually adding to its teaming facilities and that it would not be long till a large tonnage could be moved. Eight teams are now landing at the sampler be just as easy to send out 200 tons or more, if it was possible to get the ore Five men on ore now take out more than teams can be secured to Gold haul. There is room in the mine now, Gold Crown Mr. Lawrence declares, for 150 stopers. Jim Butler . New boarding and lodging house blacksmith, carpenter and machin shops are going up at the mine, ar everything about the premises give the impression that the future is being looked to for big things. The compar has been and still is, steadily acqui ing new territory, and it now looks if, before it got through, it would have an estate as large as that of the Dal Judge in the Park City district. M Lawrence states that the company mines are to be compared only to tho of the Columbus Consolidated comp ny, and he believes that it will not long till the mine is recognized as the peer of any high-grade proposition the state. He considers the Michiga and eastern bunch that owns it a luck

#### NEW DEVELOPMENT CO.

Organized by Strong Talent to Oper ate in This Region.

Intermountain Exploration com pany, formed to a general mining and prospecting business, filed articles of inprospecting business, filed articles of in-corporation with the county clerk yester-day. It is capitalized for \$500,000 in shares of the par value of \$10 each. The officers are: President, H. E. Smith of Duluth, Minn.; vice president, Peter Porter of Salt Lake; secretary, Edward J. Bricker of Minneapolis, Minn.; treasurer, Theophilus F Smith of St. Paul. Minn. These, with C. D. Rooklidge of Salt Lake, constitute the obard of directors. Emil J. Raddatz is managar of the company. The corporation has been organized to

The corporation has been organized to operate on lines similar to those which have characterized the work of the Western Exploration company. Its chief as-set at the present time is an option upon the old No-You-Don't mines in the Stockton district, owned and operated at one time by C. B. Markland. This property has been under development by a number of the men who are now members of the new exploration company and its opening will continue on vigorous lines. A new double compartment shaft is already down to a depth of 400 feet and it will not be till the known ore bodies in the

ground are tapped.

The company contains some of the strongest financial talent in the country and its treasury is already well supplied with funds. Several other mining propostions are now receiving consideration and it will not be many months till the com-pany is doing lots of business in this

Metal Markets.

New York, Sept. 11.—The London tin market was unchanged to 15s higher, with spot closing at f185 and futures at f183 15s. Locally no change was reported in the general range, which was more or less nominal at \$40.00240.50.

Copper also was higher in London, with oth spot and futures quoted at £86 17s 6d. ocally no further change was reported,

Montana-Tonopah Annual Is Pulled Off This Year Without Trouble of Any Kind.

pany, held in this city yesterday, with that which required three days to wind up one year ago. Last year there was a determined effort made by the Salt Lake and a portion of the Nevada conbusiness the session might have been Alpha Con Following is the list of final quotations the company 538,102 were represented, and unanimously voted for the following board of directors and officers: C. E. Knox of Berkeley, Cal., president; Charles E. Morris of Pony, Mont., vice president; R. P. Dunlap of Tonopah, second vice president; W. B. Alexander of Tonopah, secretary and treasurer; Henry D. Moore of Philadelphia, J. Herbert Mullen of Westchester, Pa.; F. M. Kirk of Cleveland, O.; J. J. Mc-Quillan of Tonopah, and Thomas J. Lynch of Salt Lake and Tonopah. In addition to being selected as secretary and treasurer of the company, W. B. Alexander of Tonopah was also designated as assistant to General Manager Mark B. Kerr, who, by the way, is a brother of Kenneth C. Kerr, the affable traveling passenger agent of the Salt

Kirby Is Complimented.

While the past year's operations of the company has been one of development, equipment and general prepara-lock & Co., were as follows: ment, equipment and general preparation for the work of money making ahead, and while delays in securing machinery, etc., has more or less rearded the campaign, President Charles E. Knox makes an exhibit in his report to the shareholders which, upon ts submission in printed form, cannot fail to impress them with the fact that they have a big mine, a mine that will last and produce many millions of money. In discussing the contents of his report after the meeting yesterday, Mr. Knox stated that he was anxious that everybody should know that his company was pleased with the work that had been done by John A. Kirby, who had made a splendid record during the year he was manager of the properties. Personally, Mr. Knox said, he tnew that Mr. Kirby had labored for the best interests of the company and had handled the mine with just the same attention to detail as though it the knowledge that he had made a great deal of money and had business to look after that was more important to him than the care of anybody el'se nines. In his successor, Mark B. Kerr, Mr. Knox said his company had a mos valuable man, who had the details of the business all down pat and who would make the property a great deal more valuable than it is as the years

New Equipment Placed.

Last November and December orders were placed for new mine equipment, including a sixty-foot steel gallowsframe, a double-drum, double cylinder, 5x18 hoisting engine; a twelve-drill Ingersoll-Seargeant air compressor, a 200forse-power electric motor and all the teher paraphernalia that goes to make a first-class mining plant. All of this machinery, with the exception of the hoisting engine, has been installed, and owing to delay in delivery, that was not landed at camp until a few days ago The mine has produced enough ore to meet all these expenses, including the milling plant that is now being ordered and for the installation of which work has already commenced at the mine. During the year 5,700 tons of ore was shipped and 10,787 feet of development work was done in the mine, which now boasts total openings of 22,852 feet Drifts and cross-cuts run during the year amounted to 8,203 feet, while 644 feet of winzes and raises, made for development and air connections, were run, the remainder of the total amount of work done being represented in

stopes, etc. Mine's Ore Reserves Big.

The McDonald vein was drifted on westerly on the third, fourth and fifth levels, adding 900 feet of previously un-explored territory in the McDonald vein between the old workings of the mine and the Midway lines. Drifts were also run easterly in the McDonald and South veins, opening up 500 feet of untouched territory between the old workings and the North Star. In this new territory it is now possible to measure up 39,632 tons of milling ore alone that will average \$27 a ton. estimate does not include any of the ground between the new drifts that have been run and not connected up between levels, but which is certainly

(Statement and Engineer's Report on Application.)

bright.

To facilitate the handling of material in the mine, Manager McGill intends, durthe mine, Manager McGill intends, during the next few days, or just as soon as he can get it, to equip the incline from the 400 to the 800 level with track and a skip, and discard the bucket system of hoisting. In this way, he states, he will be able to handle several times the amount of dirt that is now possible. With the ore bodies responding so nicely to development, he is anxious to get in shape to ship faster and this he can do when the skip has been installed.

Mining Notes.

Harry S. Joseph left for Wyoming Mon-lay night, expecting to be gone a week. W. K. Mordock, superintendent of the Honerine mines and milling plant, at Stockton, was in the city yesterday on

W. H. Childs returned from a business trip to Ramsey, Nev., yesterday morning. He says the camp is forging ahead at a rapid pace and that its future is assured. Ten cars of ore from Tintic, six from Nevada, two from California and one from Idaho were released from the Tayor & Brunton sampling works yesterday

B. F. Kelly, the well known mining operator, leaves today for Eureka, Nev. He has his eye on something out that way and has a notion that he will locate in that town in that town. President Charles M. MacNeill of the

Utah Copper company, accompanied by General Manager D. C. Jackling and Consulting Engineer R. C. Gemmel, spent yesterday at Bingham in an inspection of the ig company's properties. A San Francisco dispatch over the Pollock private wires during the afternoon stated that the Tonopah-Midway company had declared a dividend of 5 cents a share, payable Oct. 1. Books close against the transfer of stock on the 20th.

Arthur R. Parsons, mill superintendent for the Tonopah Mining company, came in from the west Monday and left yesterday for Denver, where he has gone to confer with the company's general manager, Frank A. Keith. He expects to stop off a day on his return next week. Judge J. C. Campbell of San Francisco who made friends here a year ago for the impartial manner in which he presided at the stormy meeting of the Montana-Tonopah company, was in attendance at yesterday's meeting also. Owing to urgent business he was compelled to leave for home on the afternoon train

ome on the afternoon train, The new compressor plant at the Yan-kee Consolidated has been in commission since Sunday, and the report from camp is to the effect that it is doing its work like a veteran already. The mine is also said to be looking fine and good news is promised from the lower levels, now that it is possible to get at them again.

J. E. Bevis, one of the best known operators in the Bullfrog district and the original locater of the Shoshone-Polaris and Amethist mines, is in the city for a day on his way back to the Nevada camps after an extended trip to New York. Mr. Bevis states that the Bullfrog country will shortly be moving at a pace that will attract wide attention.

Frank M. Leland, the old manager of the White Knob Copper company's properties at Mackay, Ida., is visiting in the city for a day or two, after an extended trip to Paris, France. He is sporting one of the finest gold watches that was ever manufactured, a present htat was made to him by William Breevort and Clarence K. McCornick.

ADDITIONAL MINING **NEWS ON PAGE 10** OPPORTUNITY.

To the parties who will finance a group of copper claims, seven in number, in Nevada I will give to them a 51 per cent interest in same, showing A 1. For particulars see P. D. Delmas. who has full power to authorize and do business on same. Ore can be seen Claim 300 feet from railroad. Address 747 South Third East, Salt Lake.
